

What is bioline™ made from?

Bioline™ is made from a custom plant based material that is 100% biodegradable in the environment.

How long will bioline™ last on my reel?

Bioline™ retains 100% of its tensile strength for 10-12 months on your reel. The performance will not be affected due to normal fishing line use.

How does bioline™ Biodegrade?

Bioline™ biodegrades using natural bacteria in the environment, turning into minimal CO2 and H2O. It takes extended exposure of natural bacteria to begin breaking down. Medical lab tests show that even in the most extreme conditions, performance will not be affected for 10-12 months of use.

How will I know when to change my line? What if I do not use my whole spool in a year?

Just like the line you are used to, you can tell when Bioline needs to be changed. It will turn a milky white when it needs to be changed.

If you store your spool back in the sealed pouch, in a cool dry place, Bioline can hold nearly all of its tensile strength. We do not know the conditions you store your line in, so we recommend using it all within 12 months.

What type of knot is recommended?

Bioline is like fluorocarbon where the structure runs vertical unlike mono's horizontal structure. Common Fluorocarbon knots are recommended.

How does stretch differ from other lines?

The bioline™ stretch is the same as monofilament, about 25%. Although it feels different, it is designed for quick recoil to enhance knot security and handling. Unlike mono, stretching Bioline does not result in strength loss, stretching the material can remove pigtails, any memory incurred, and bounce back to its original form.

BIOLINE SIZE	3LB (6X)	4.5LB (5X)	6LB (4X)	8LB (5X)	10LB (2X)	12LB (1X)	20LB
Avg Dia (in)	0.007	0.008	0.009	0.011	0.013	0.015	.019
Avg Dia (mm)	0.18	0.20	0.25	0.30	0.34	0.38	0.50
Straight Pull	3.15	4.6	7.3	8.15	10.15	12.5	20.5
Knot Pull	2.5	3.4	5.25	6.3	8.6	10	15

Diameter average of 8% larger than the industry's other brands.

Straight Pull: Comparable to leading Mono and Fluorocarbon

Knot Pull: 20-30% higher than leading Mono and Fluorocarbon Brands

MSRP: USD \$14.95
